PRIORITY MATRIX

Presented by: Kartik Raghuwanshi

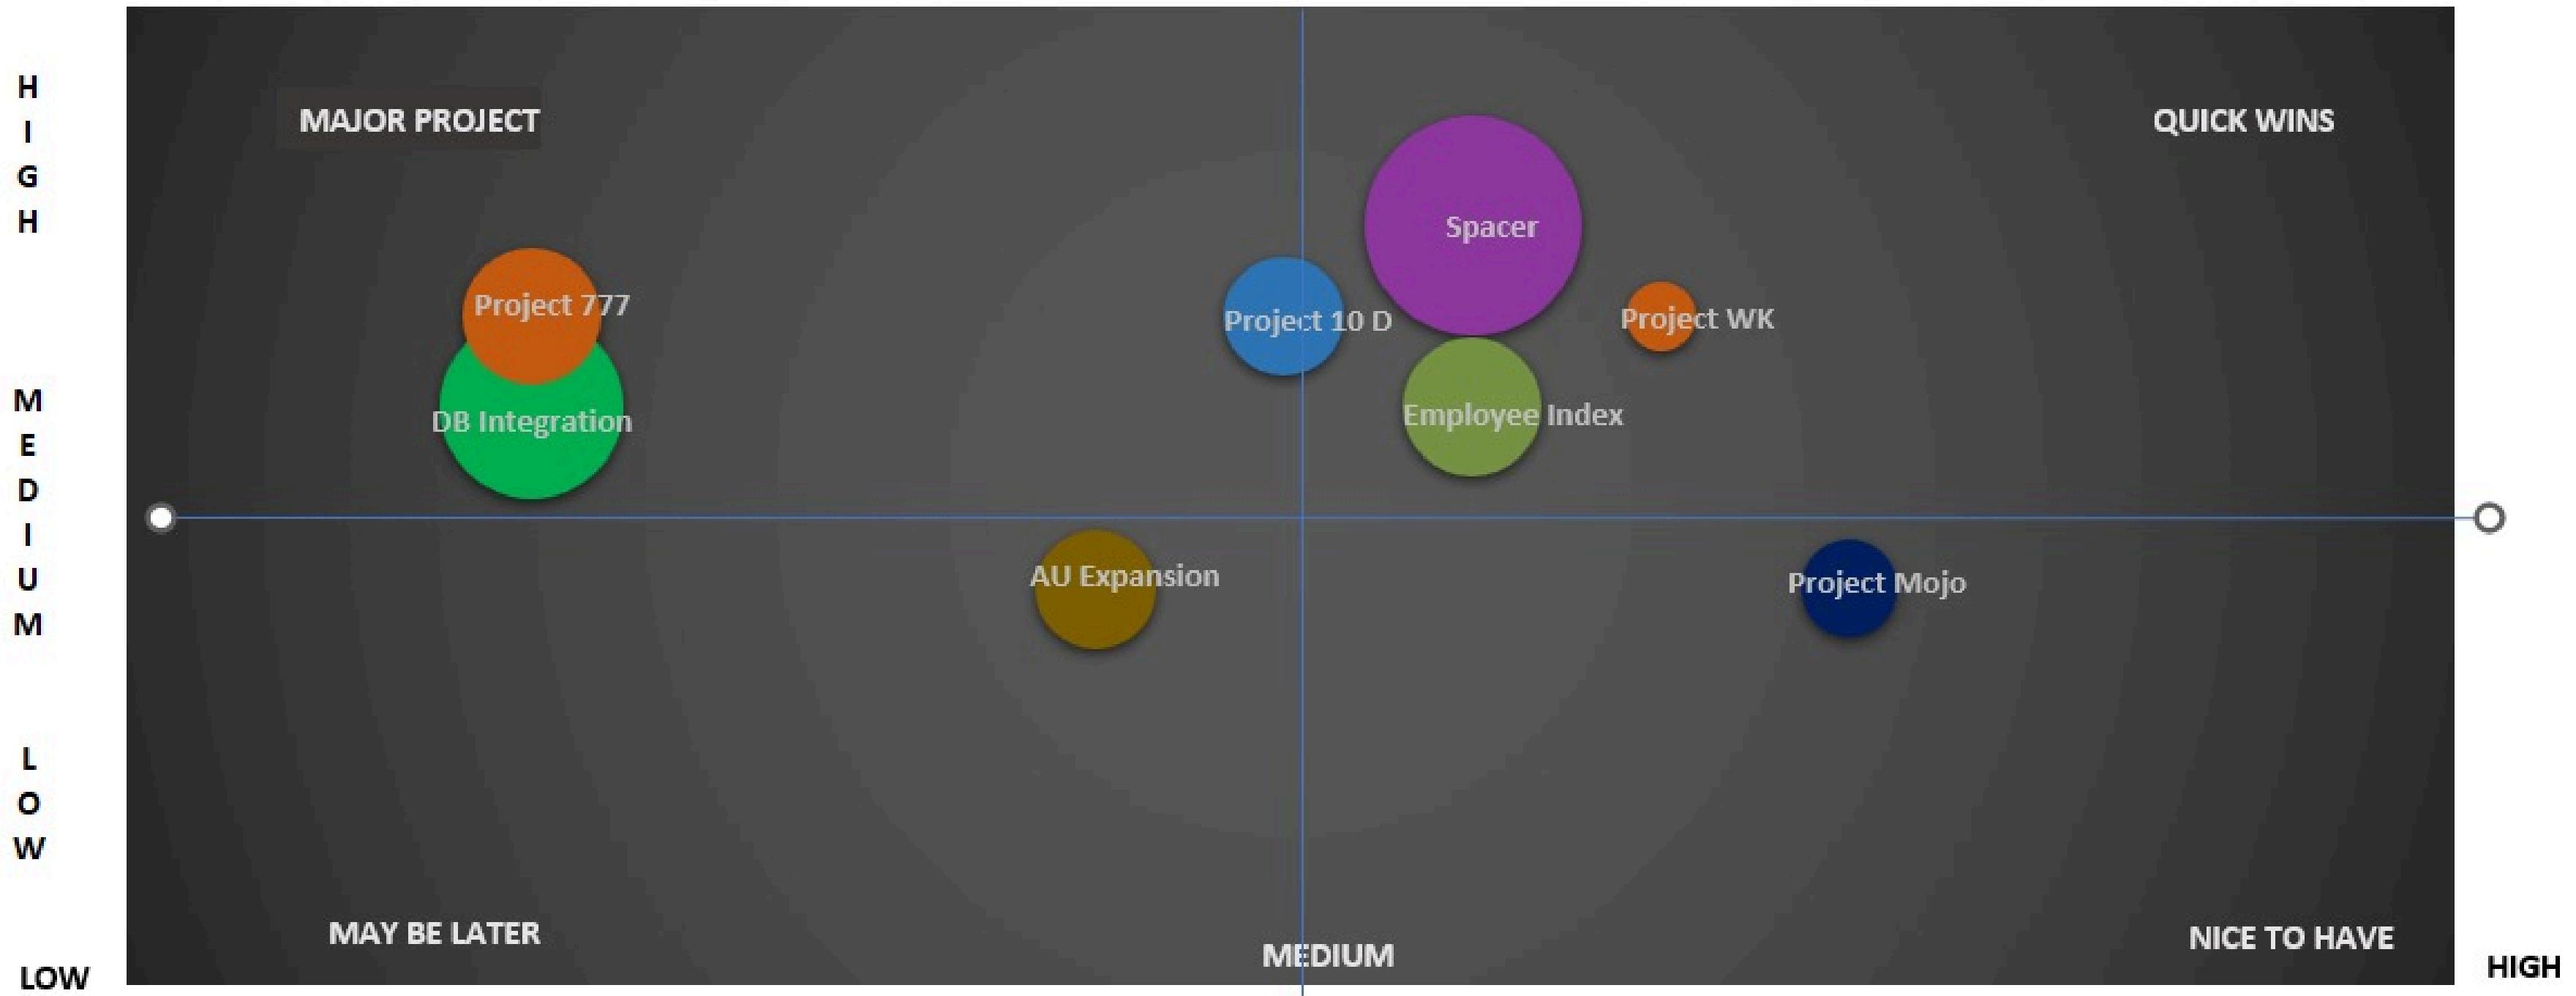

INTRODUCTION

A priority matrix sorts tasks or projects by a defined set of variables, like urgency and effort. With this tool, team members can quickly determine what to tackle first. In this piece, we'll discuss various types of priority matrices and explain how you can use them to accomplish more at work.

PROJECT PRIORITY MATRIX

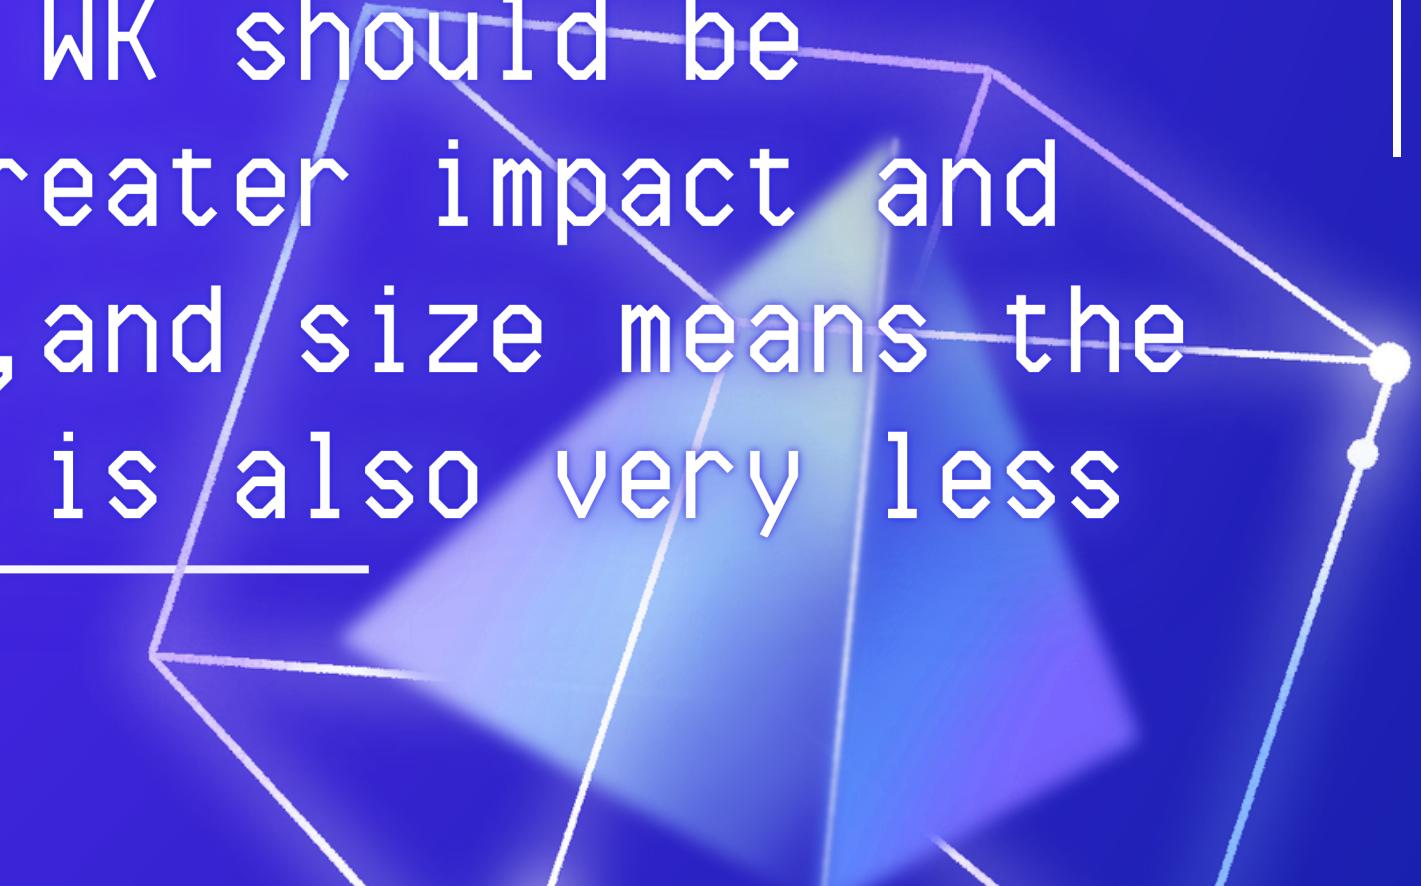

Criteria ▾ Spacer ▾ Project Mojo ▾ AU Expansion ▾ DB Integration ▾ Employee Index ▾ Project 777 ▾ Project 10 D ▾ Project WK ▾

Feasibility	7	9	5	2	7	2	6	8
Impact	8	4	4	6	6	7	7	7
Size	10	2	3	7	4	4	3	1

Q1 Which Project need to be chosen first?

Ans. As per the graph considering all the three parameters Project WK should be chosen first as it has greater impact and feasibility is also high, and size means the time it takes to complete is also very less

THANK YOU!
